

NOVABLADE™ SURFACE MOUNT

LL9P126SK Series Novablade Mounting Accessories

Installation Extras

NovaBlade products are a fantastic light source, and while a majority of applications are in T-bar ceiling systems where they just drop into place, NovaBlade can do much more with the help of specialised mounting frames.

The surface mount provides a tidy solution for concrete slabs and similar situations. It is an attractive enclosure that has ample space to house the driver and the panel. Once the enclosure is mounted, the panel just drops in. For higher security applications optional security screws can be included. Finished protrusion is 50mm.

NovaBlade Flush Mount Frame Features at a Glance

- For mounting onto ceilings where driver cannot be recessed
- Driver fits behind the panels either fixed to the back of the panel or to the base of the mounting frame
- After fixing, the NovaBlade just drops into the frame and self centres
- Safety cables and provision for frame earthing provided
- Provision for security screws to be fitted to prevent unwanted removal of panel
- Seven Year Warranty
